

Fine-Light

Skin Rejuvenation System

Manufactured in the UK

Simple, effective and safe,
turn back the clock now.

Professional salons and spas have long been using LED Light Therapy to smooth and diminish fine lines and wrinkles. The Fine-Light skin rejuvenation system is perfect as a home treatment and can be used to ensure your skin remains in the best condition and looks great at all.

Fine-Light is the perfect solution for reducing those fine lines and wrinkles as well as rejuvenating the look of the skin.

Fine-Light can:

- Smooth out the fine lines of aging
- Work to reverse the onset of wrinkles
- Reduce puffiness around the eyes
- Reduce the effects of saggy skin tone
- Increase the skin's ability to hydrate itself
- Reduce the size of skin pores
- Smooth the texture of the skin
- Restore a youthful skin tone
- Lighten age spots
- Promote radiance

Fine-Light. The most amazing product

Fine-Light is a safe and revolutionary skin rejuvenation system using the latest Red LED Light Therapy technology. This tried and tested technology has long been the secret of professional salons and spas.

The Fine-Light mask is easily portable, and in just 20 to 35 minutes can assist your skin to display a more youthful look. You will notice the difference in no time at all.

Fine-Light is light, comfortable and easily worn. As the light produced by the LEDs is quite bright, it is recommended that the user wears the tinted safety glasses which are included with the system. It is also advised the user rests during the treatment. So, there you have it - rest is recommended and this is an ideal time to grab 30 minutes of 'me time' out of your daily routine. That, in itself, is a great bonus.

LED Light Therapy - how it works?

Red LED light is a powerful stimulant to the dermis and is an effective way to energise the cells of the skin, promoting the production of collagen and elastin. Lack of collagen and elastin in the skin's cells can result in fine lines and wrinkles. LED Light Therapy has a direct effect on the regeneration of the skin, penetrating the top layers of the skin, energising the skin, producing collagen and elastin, which helps to plump the skin and reduce fine lines and wrinkles. This is known as Photo Rejuvenation.

Light Therapy Works!

Light Therapy has the desired effect of rejuvenating the skin without the need for surgery, chemicals, injections or painful procedures. Referred to as the 'No Knife Face Lift' this technology is fast becoming the preferred solution for those seeking to strip away the years. It is the safest, most affordable way to achieve radiant, younger looking skin.

So, why can't you get the same effect from sunlight? Well, you can, but sunlight also contains harmful Ultra Violet (UV) rays which damage the skin. Fine-Light bathes the skin in a pure light source that generates much needed protein and in turn, allows the cells of the dermis to regenerate, plumping the skin and increasing levels of elasticity.

Does LED Light Therapy really work?

LED Light Therapy technology is tried and tested. Used extensively in professional salons, this technology is now available for home use. Tested and evaluated by many medical practitioners, the technology was developed by NASA in the United States and continues to be the focus of reports and white papers on skin rejuvenation.

How long will it take before I see results?

The visible results will depend upon each individual and may be affected by: age of the user, skin condition, diet, smoking and drinking habits. The average time in which a user of Fine-Light will see tangible results is 4 to 6 weeks. For others it may be longer, and in many cases some individuals will see results immediately.

Is LED Light Therapy safe?

Using the Fine-Light skin rejuvenation system is safe and completely non-invasive. It has been used for years in numerous medical procedures, spas, the offices of aestheticians and dermatologists and consumers around the world. Ensure you read the operating instructions before commencing your treatments and always wear the combi glasses supplied with the kit.

Is anti-aging LED Light Therapy right for you?

Of course it is! Control the aging with Fine-Light.

Acu-Clear

Skin Cleansing System

Manufactured in the UK

Spot problems? What spot problems?

Let Acu-Clear create the clear skin you want to live in.

Whether you are a teenager or adult, it's a fair bet that you may be suffering from spots which may be ongoing and could be causing scarring. In fact, 8 out of 10 teenagers suffer from spots, so you are not alone, with many teenagers carrying skin problems into their adult years. Dermatologists and skin care specialists recommend LED Light Therapy technology as a deterrent and as a form of ongoing control of teenage spots.

What can Acu-Clear do for you?

It's effective because it:

- Cleanses the skin of the harmful bacteria that causes spots and pimples.
- Reduces inflammation.
- Prevents further breakouts.
- Shrinks enlarged pores.

Acu-Clear. The most amazing product

Acu-Clear is a safe and revolutionary skin cleansing system using the latest LED Light Therapy technology. By harnessing the power of blue LED light, Acu-Clear reduces the bacteria which cause spots, reduces inflammation and minimizes scarring.

Easily portable, the Acu-Clear mask system is used for just 20 to 30 minutes cleansing the skin of the harmful bacteria that may cause infection.

Just how does Acu-Clear work?

When the pores of the skin become blocked or clogged, bacteria begin to grow resulting in spots. The bacteria contained in the inflamed pores can spread to the skin which aggravates the skin surface causing every teenager's nightmare - spots.

The Blue LED Light Therapy gets right down into the core of the skin's pores, helping to cleanse the skin of the harmful bacteria that causes spots, reducing inflammation and rejuvenating the look of the skin.

While LED Light Therapy is a proven aid to skin cleanliness, the successful treatment of skin problems will benefit from a good skin care regime as well as regular use of the Acu-Clear LED face mask.

Dare you... tell your friends?

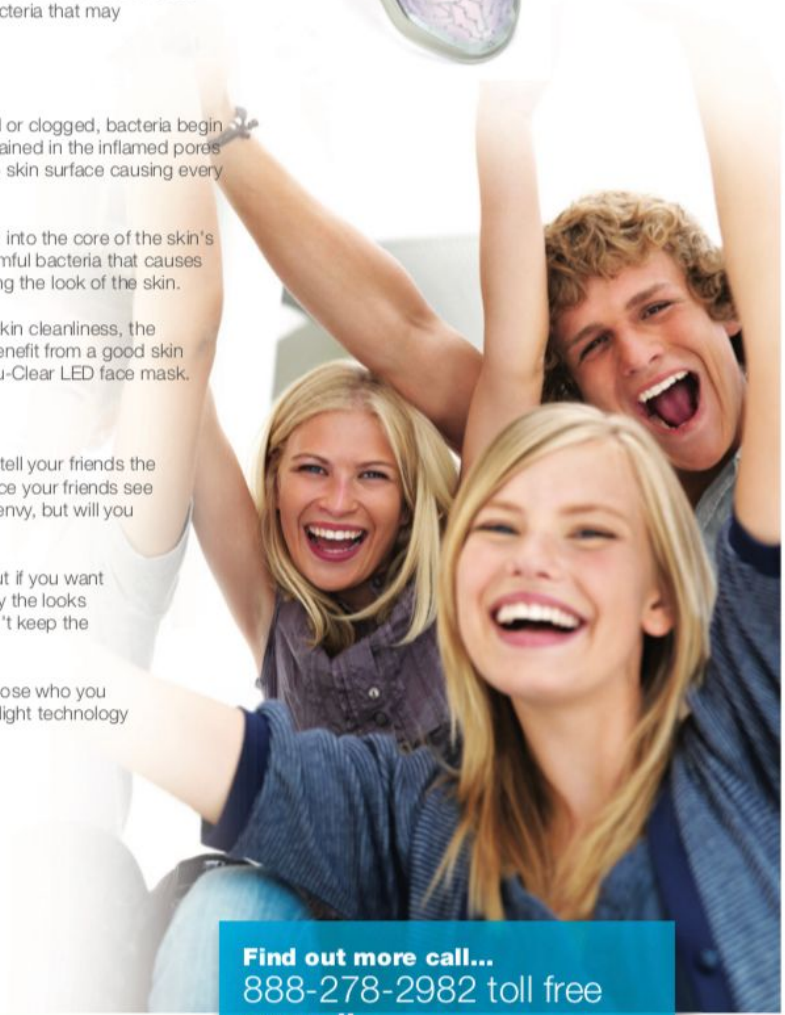

Acu-Clear is a secret to share, but dare you tell your friends the secret of your clean and clear new skin? Once your friends see your new complexion they will be filled with envy, but will you share your secret?

The secret of Acu-Clear is yours to share, but if you want our advice, we would say nothing. Just enjoy the looks of envy, wonder and adoration, until you can't keep the secret anymore.

Then and only then, pass this leaflet on to those who you think would benefit from the Acu-Clear LED light technology skin care system.

Creating the clear skin you want to live in.

For guys and girls, having clear, clean skin just became easier
